

MOVIO Handbooks

Version 00.01: Module Builder

Module Builder

The module Builder from a CSV file

The screenshot shows the MOVIO Modules Builder interface. The top navigation bar is green and contains the MOVIO logo, the text "MOVIO", and links for "Edit language" (set to Italiano) and "Logout". The left sidebar lists navigation options: "Site Contents", "Ontology Builder", "Modules Builder" (highlighted with a red box), "Mobile App", "Moduli", "Media archive", and "Users and Groups". The main content area is titled "+ Modules Builder" and contains three options for creating a new module, each with a "Next" button:

- Creating a new module from file
- Creating a new module from a table already existing in the database
- Creating a new module

Select the file to import and properties that indicate the delimiter characters contained in the CSV file.
The table of the database will have the same name as of the CSV file, if the table already exists the new records will be added; if the table already exists and the number of fields is different the file will not be imported.

File to import	Sfoglia... Nessun file selezionato.
End caracer	;
Field delimiter	.
Escape character	\

Example of a CSV file

Modules Builder

Indicate for every field of the table:

- the table that will appear in administrative panel and on the site page
- field type
- if the field is mandatory
- if the field is searchable on the site page
- if the field is present in the search results
- if the field is present in the list in the administrative panel

The order in which the fields will appear on the site page and in the administrative panel may be changed by dragging the row of the table
